

CSSM 502: ADVANCED DATA ANALYSIS IN PYTHON

Ezgi AYDIN

07/12/2021

Hypothesis: Higher government expenditure in education would predict female senior management ratio. For the purpose of this work, I have collected the data from world bank data API. The indicators that I worked with were as follows:

1. Dependent: Female share of employment in senior and middle management
2. Independent: Females with at least bachelors or equivalent degree
3. Control: Government expenditure on education
